Care Can Feel Out of Reach

Patients may feel unsupported and avoid returning for regular visits

02

Incomplete Health Information

Patients who use wheelchairs don't always have the option to get an accurate weight assessment which affects many areas of treatment

03

Delayed Diagnosis

Without accurate information like weight or other physical examinations, diagnoses may be delayed

With Your Support!

Appointments Feel Empowering

Everyone will feel they get the most out of their appointment and leave with confidence that they're in good hands

02
